		GENERATE

#### Generated app password

Password .....

• Record the 16 character password that was generated. You will enter this in DRM Windows in the Email Password field.

	Your app password for your device
	cgan vlru cqdh sfor
	How to use it
ecuresally@gmail.com	Go to the settings for your Google Account in the application or device you are trying to set up. Replace your password with the 16-
sword	character password shown above. Just like your normal password, this app password grants complete access to your Google Account. You won't need to remember it, so don't write it down or share it with
	anyone.

DONE

• In DRM Windows navigate to the Utilities/Options menu and edit the "Mailbox Password" record.

Remove the Show Asterisk check so that you can see the text and enter the 16 character code without any spaces.

Now you can use DRM Windows to send emails from your Gmail mailbox!
